

Subject: Price Increase Notification Due to Anti-Dumping Investigation

01 June 2025

Dear valued customer,

We hope this message finds you well. We are writing to inform you of an important update regarding our pricing for products produced at our EU facilities.

The European Commission has initiated an anti-dumping proceeding with regard to imports into the Union of continuous filament glass fibre products originating in Bahrain, Egypt, and Thailand. The investigation estimates dumping margins for Bahrain up to 49%, for Egypt up to 95%, and for Thailand up to 146%, with an injury elimination level up to 37%, 55%, and 57% respectively. The amount of possible future liability would normally be set at the lower of those two levels according to Article 7(2) of the basic Regulation.

Due to this ongoing anti-dumping investigation and the earlier than expected registration of imports, as announced in the attached PDF, we are compelled to increase the pricing on products that use rovings from Jushi Egypt or CPIC Bahrain. This increase is based on the percentages referred to in the attachment and will be applicable for all shipments from June 15th onward, unless individually otherwise agreed.

Please be assured that the responsible sales manager for your account will contact you with the exact details of the price adjustments. Additionally, they will provide you with alternative options from other roving sources and/or SAERTEX facilities to potentially mitigate the impact of this price increase.

We appreciate your understanding and cooperation in this matter. Should you have any questions or require further information, please do not hesitate to reach out to your sales manager.

Thank you for your continued partnership.

Yours faithfully,

Christian Beckmann
