## Price Adjustment Notice

### *Ketone Peroxides*

Dear valued customer,

Ongoing instabilities in global energy markets and supply chains, which have been intensified by recent geopolitical developments in the Middle East, have led to substantial cost increases across energy, raw materials, and transportation. These developments are occurring rapidly and remain highly unpredictable.

Despite continuous efforts to offset these impacts internally, we are no longer able to fully absorb the resulting cost pressure.

### Introduction of a Surcharge

With effect from **1 April 2026**, we will introduce a surcharge of **EUR 0.25 per kg** on all ketone peroxide products.

Key conditions:

- The surcharge applies based on the **delivery date**, regardless of when the order is placed.
- It will remain in force **until further notice**.
- Given the volatility of the current environment, we **reserve the right to amend the surcharge** at short notice should cost levels change materially.

### Current Market Environment

The situation remains exceptionally dynamic, with continued uncertainty around cost levels, logistics, and availability. While we carefully manage pricing and monitor developments closely, such conditions may necessitate adjustments even after orders have been confirmed, which would be addressed transparently and in dialogue with you.

### Our Commitment to Supply

As a dependable partner with strong production and inventory capabilities, our priority remains the secure and reliable supply of our products. We appreciate your understanding that, under the present circumstances, maintaining historical pricing levels across all orders is not always feasible.

For planning purposes and to support stable supply allocation, we recommend placing orders as early as possible.

If you have questions or wish to discuss the impact on your business, your usual contact will be happy to assist.

Kind regards,

**Andreas Pohl**

Vice President & General Manager EMEA
