

AOC Announces Price Increase for EMEA

15 March 2022

AOC has today announced a price increase of €150 per ton for its entire portfolio of Unsaturated Polyester (UPR) and Epoxy Vinyl Ester (VE) resins sold in Europe, Middle East and Africa. The price increase will be effective April 1st, or as soon as contracts allow. This price increase is in addition to the previously announced increase of February 22nd, 2022.

“AOC is seeing steep increases in the cost of all main raw materials. This leaves us no choice but to further raise the prices of our products as a result”, explains Fons Harbers, Vice President Marketing & Sales EMEA of AOC
