BÜFA® BF- 50 Heavy Duty Buffing and Polishing Compound

General:

BF-50 is a strong, fast cutting buffing paste to remove coarse marks and scratches from moulds and finished parts. It does not contain wax or silicone and therefore it is recommended for high-temperature and high-pressure machine buffing.

Properties:

Appearance:	soft, smooth paste
Colour:	whitish
Odour:	characteristic
Density:	~ 1,3g/ml
pH-value:	~ 8,0
Grain-Size µm (aprox. range):	> 40 - 90
Grain-Size µm (average):	~ 60
Solubility:	partly in hydrocarbons

Comments:

BF-50 is one component of BÜFA'S MOULD RELEASE AND MAINTENANCE SYSTEM. More detailed information regarding this system can be supplied upon request. This documentation describes the application of BF-50 as well as the other parts of this system.

Storage:

Shelf life of at least 24 months if stored in its original unopened containers in a dry and cool place. Avoid freezing and prolonged temperatures above 30°C (86°F).

Note:

Safety data sheet available on request.

The data given above are based on current knowledge and experience. The data do not signify any warranty.
