### **BÜFA® BF- 700 Mould Release Wax Paste**

#### **General:**

BF – 700 is a solid emulsion of pure carnauba wax in hydrocarbon solvents and water. It forms a very hard and resistant coat on mould surfaces resulting delayed formation of styrene/wax residues (wax-built-up) and avoid pre-release causing high costs of working. BF-700 does not contain silicone.

#### **Properties:**

Appearance:	pasty
Colour:	beige
Odour:	characteristic
Density:	~ 0,88 g/cm <sup>3</sup> at 20 °C
Flashpoint:	> 65 °C

#### **Comments:**

BF-700 is one component our MOULD RELEASE AND MAINTENANCE SYSTEM. More detailed information regarding this system can be supplied upon request. This documentation describes the application of BF-700 as well as the other parts of this system.

#### **Storage:**

BF-700 has a shelf life of at least 24 month if stored in its original, unopened containers in a dry and cool place. Avoid freezing and prolonged temperatures above 30°C (86°F).

#### **Note:**

Safety data sheet available on request.

The data given above are based on current knowledge and experience. The data do not signify any warranty.
